

ProneView®

Protective Helmet System

3 Million
Safe Clinical Uses

Patient Positioning Made Easier

The **ProneView®** Protective Helmet System consists of a sturdy protective helmet, reflective mirror base and a soft cushion insert. Together the ProneView Protective Helmet System provides a safe and effective platform for prone positioning.

ProneView can be used on any general surgical table or on the Mizuho OSI Spine Surgery Top. ProneView meets AORN guidelines and recommended practices, and the American Society of Anesthesiologist's Practice Advisory for safe prone positioning.

Adjustable Protective Helmet Features

A. Adjustable Knobs

- Four large knobs attached to the helmet offer easier adjustments once the patient has been rotated onto the surgical table
- Easier alignment on to the mirror platform
- Larger range of height adjustment for better neutrality of the neck

B. Mirror Base

- Easily aligns with the pegs located on the base of the Adjustable Protective Helmet
- Allows for continuous eye monitoring during procedure
- Fast and easy clean up, with nothing attached to the surface

C. Disposable Face Cushions

- Specifically designed to fit into the ProneView helmet
- The soft cushions contour to the anatomy of the face providing excellent pressure equalization
- Large eye openings assure no pressure on the orbits
- Available in three sizes

A Proven System of Adjustable Stability

- Ranked best in clinical testing¹
- Superior eye visualization from 3 directions
- Advanced anatomical fit
- Optimum pressure redistribution
- Easy neutral neck positioning
- Aids Anesthesiology safety checks
- Easily cleaned with standard disinfectants
- Contoured cushion inserts improve stability
- Designed to meet AORN perioperative standards and recommended practices as well as ASA practice advisories

Quick and Easy Adjustments

Offers a 1.65" (4.19 cm) range of elevation for easier patient positioning

Independent adjustability for improved neutrality of the patients neck
