

Orange Aid[®]

Pressure management gel products

Reduce The Risk Of Pressure & Positioning Injuries

Orange Aid® Gel Products improve patient positioning by distributing pressure and heat during surgical procedures. Orange Aid products are specifically designed to stand up to the rigors of the OR environment and can be used with all surgical tables. These unique pressure management gel pads are made without natural rubber latex and the distinctive orange color helps avoid inadvertent disposal.

Prior to positioning Orange Aid Gel Products clinical assessment guidelines and objectives should be used to identify each patient's risk for potential pressure-related problems associated with lengthy surgeries.

Orange Aid® Features

- Durable and strong
- Non-absorbent
- Evenly distributes weight
- Not made with natural rubber latex
- Will not bottom out
- Easy to clean
- Reusable

Cleaning. Care. Storage.

The integrity and shelf life of Orange Aid products can be increased significantly by following simple protocols for cleaning, care and storage.

- Disinfect Orange Aid product between patient uses with standard operating room cleaning solutions
- Rinse Orange Aid with water and wipe dry after cleaning
- Do not allow gel product to soak in cleaning fluids for prolonged periods of time
- Do not autoclave, freeze, or microwave
- Do not puncture, cut or tear Orange Aid products
- Keep Velcro® attachments free of foreign matter to ensure adequate closure
- Warm Orange Aid products by placing in a blanket warmer or by placing below a patient warmer. Do not exceed temperatures of 100°F (37°C)
- Store Orange Aid products flat when possible to decrease the potential for damage; large pads may be folded loosely to avoid creasing
- Do not store heavy or sharp objects on top of Orange Aid products
